EDUCATION

The LNM Institute of Information Technology, Jaipur

Oct 2022 – June 2026

Bachelor of Technology (B.Tech), Computer Science Engineering

Relevant Coursework: Machine Learning, Data Science, Data Analysis, Statistical Methods, Deep Learning, Natural Language Processing, Generative AI, Artificial Intelligence

EXPERIENCE

Bright Media Solutions Pvt Ltd.

Feb 2026 – Present

Data Science & AI Intern

Analytics, ML Pipelines, Data Visualization, Automation

- Analyzed lead and engagement datasets using **SQL, Pandas, and Matplotlib**, performing **exploratory data analysis (EDA)** to identify conversion trends, customer behavior patterns, and actionable business insights for stakeholders.
- Designed end-to-end **data collection, cleaning, and preprocessing pipelines** (lead enrichment, web scraping, CRM integration), boosting data completeness by **~60%** and eliminating manual data processing effort.
- Built **interactive dashboards and reports** to track KPIs, monitor campaign performance, and support real-time data-driven decision-making across cross-functional teams.
- Engineered **RAG-based AI solutions** using Python (Pandas, NumPy, Scikit-learn), orchestrating LLM-based agents that elevated lead response efficiency by **~40%** through automated data retrieval and analysis.
- Implemented and optimized **data pipelines** using Python and SQL, ensuring efficient data processing, reporting workflows, and data accuracy across analytics platforms.

PROJECTS

Fintech Transactions & Revenue Analytics Dashboard | *SQL, Python, Power BI, DAX, ETL*

2025

- Built a multi-page **Power BI dashboard** analyzing **100K+ financial transactions**, tracking KPIs including revenue, transaction volume, customer acquisition cost, and churn rate across regions and payment channels.
- Designed a **dimensional data model** (star schema) with fact and dimension tables in SQL, enabling efficient querying and drill-down analysis by transaction type, geography, and time period.
- Performed end-to-end **ETL pipeline development** using Python (Pandas, NumPy) for data extraction, cleaning, transformation, and loading into the SQL database for Power BI consumption.
- Created **DAX measures** for YoY growth, rolling averages, customer segmentation, and cohort analysis, enabling stakeholders to identify trends and make data-informed strategic decisions.

Enterprise Multi-Modal Retrieval-Augmented Generation System | *Python, LLMs, Vector DBs*

2025

- Developed a scalable **retrieval-augmented generation pipeline** for querying **10K+ documents**, improving answer accuracy by **~40%** using optimized retrieval, embeddings, and semantic search techniques.
- Reduced hallucinations and inference cost by **30–40%** through grounded generation, prompt engineering, and context pruning strategies.

BitArray – Custom Memory-Efficient Data Structure | *Python, Algorithm Design, Unit Testing*

2024

- Designed a custom BitArray data structure with **30+ API methods** covering indexing, slicing, mutation, and comparisons with **100% unit test coverage**.
- Achieved **8× memory reduction** and **40–50% faster execution** over baseline using native integer-based bit packing with $O(1)$ access time.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Scikit-learn), SQL, C++, R (basic)

Data Analysis & ML: Exploratory Data Analysis, Feature Engineering, Hypothesis Testing, Regression, Classification, Clustering, Logistic Regression, Decision Trees, Deep Learning, Predictive Analytics

Data Visualization: Power BI, DAX, Matplotlib, Seaborn, Data Reporting, Dashboard Development

Gen AI & NLP: LLMs, RAG Framework, Semantic Search, LangChain, Agentic AI, Prompt Engineering

Tools & Platforms: Git, FastAPI, TensorFlow, PyTorch, Google Cloud (Vertex AI), Docker, VS Code

LEADERSHIP & CERTIFICATIONS

- Fest Head, VIVACITYxLNMIIT:** Spearheaded execution of 50+ events with 600+ participants, coordinating cross-functional teams, artist logistics, and stakeholder communication – demonstrating strong problem-solving, teamwork, and organizational skills.
- Certification – Zero to Mastery** (Tutor: Andrej Karpathy): Completed comprehensive training in machine learning and data science, covering neural networks, model evaluation, and end-to-end ML workflows.
